UNIQUE FULL-INVERTER TECH

Brings 7-Hour Endurance

Precise coordination of 3 motors

The Full-inverter control system well coordinates the running power of 3 DC motors between 20%~100% (averagely 50%), making them perfectly match each other to realize longer endurance.

Adjustable suction & running power

In different conditions, the Full-inverter control system will intelligently adjust the most suitable motor running speed to bring the best flow and cleaning effect with the lowest energy consumption.

1.5X COVERAGE EFFICIENCY

Optimized path covers 1.5 times more area than random path for more efficient and better pool cleaning performance.

4 CLEANING CYCLE OPTIONS

For various pool sizes, the robot offers 4 optional cleaning cycles (1h/1.5h/2h/Max) to satisfy different needs.

MORE FEATURES

2 Cleaning Modes Selectable
Floor only; Floor/wall/waterline

Finer Filter Basket
120μm filter to collect finer debris

Auto Park
Auto park by the pool edge for easy pickup
