

Let op : Dit betreft de nieuwe bediening vanaf 2021

Indien de afstandsbediening de verbinding lijkt te hebben verloren:

Connectie procedure:

1. Zorg ervoor dat de afstandsbediening UIT staat.
2. Sluit de afstandsbediening aan op de stroomvoorziening, zorg dat u heel dichtbij bent - op maximaal 20 cm afstand.
3. Druk tegelijkertijd op de rechter en linker richtingspijlen totdat u twee pieptonen hoort en de voedingseenheid een continu blauwe verbindings-LED toont.

(Als de PS is verbonden met de WiFi thuis van de gebruiker, zal de LED groen + blauw knipperen)

# **BLUETOOTH® REMOTE CONTROL UNIT**

Congratulations on your new Remote-Control Unit!

The remote will allow you to control your Dolphin robotic pool cleaner around the pool manually or to set an automated cleaning program.

## HOW TO PAIR YOUR REMOTE-CONTROL UNIT TO THE IOT POWER SUPPLY?

1. Make sure the remote control is OFF.
2. Plug-in the IoT power supply.
3. Attach the remote-control to the power supply.
4. Press simultaneously on both right and left direction control arrows until you hear two beep sounds, and you have a clear view of the remote-control screen.

## STRAT CLEANING

1. Press **Start** .
2. The power supply will turn on, indicated by a blue LED light.
3. The robot will start cleaning according to selected settings.

## MANUAL DRIVE MODE DRIVE

You can use the manual drive mode to navigate your Dolphin robotic pool cleaner around the pool.

1. Turn on the robot and wait for 1 minute, until the self-test is completed.
2. Press the **mode selector**  and use the direction control arrows to navigate your robot around the pool.

## AUTOMATED CLEANING PROGRAMS

The remote-control unit offers two automated cleaning programs:

### 1. Delayed operation

Enables you to set the robot to clean the pool later, by pressing **Start later**.   
The power supply will start blinking green.  
After one hour, the robot will start working.

If you wish to cancel this program, press again the start later icon.   
When the power supply stops blinking, the program is canceled.

### 2. Weekly scheduling

Enables you to set your own cleaning program.

You can choose if you want to clean your pool every two days or every three days.

To clean your pool every two days, press .

To clean your pool every three days, press .

The scheduling program is valid for one week only.

**Note:** If the signal bar is blinking  or you lost connection with the power supply, it could be due to one of these reasons:

Possible reason	Solution
The power supply isn't plugged in	Plug in the power supply
The remote-control is not in range	Move closer to your power supply
The remote control isn't paired with your robot	Make sure the remote-control is OFF. Attach the remote-control to the power supply. Press simultaneously on both right and left direction control arrows until you hear two beeps, and the power supply shows a steady blue connectivity LED.

In case of difficulties operating the remote-control try to unplug the power supply, wait for 30 seconds, and plug-in again. Now, repeat the above steps, or contact our Customer Care team:
